

Lead Generation Flow

Built & orchestrated end-to-end with **Claude Code** — the agent brain that wrote the scripts, ran every scraper & API, did the web research, and scored the leads.

THE PROBLEM

A list that just *fits* the ICP isn't enough. There's no signal for which companies actually need a cold-email tool right now — and a big chunk of scraped emails bounce, so reps can't even reach them.

WHAT IT WAS COSTING

Reps burn time on cold accounts with no timing signal, and the best-fit prospects get worked by a competitor first.

TOOLS AND APIS USED

- Claude Code — agent brain
- Python
- pandas
- Playwright + Chrome
- Apify — Leads Finder
- Apify — LinkedIn Jobs
- Apify — Profile Posts
- Apify — Profile Scraper
- BlitzAPI — Employee Finder
- GetLeads
- Clay
- Crunchbase
- Clutch

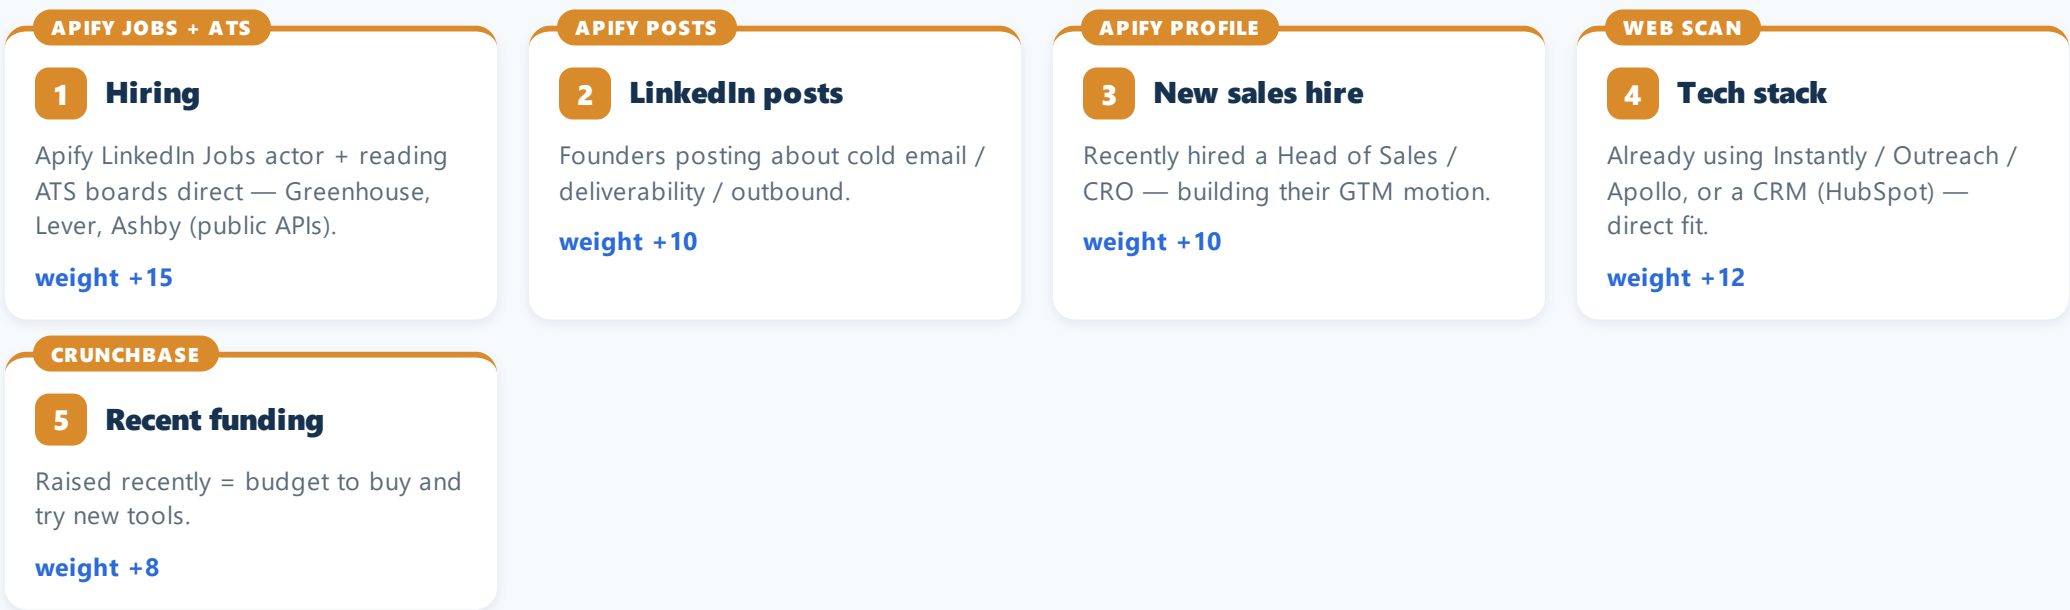

STAGE 1 · SOURCE & CLEAN

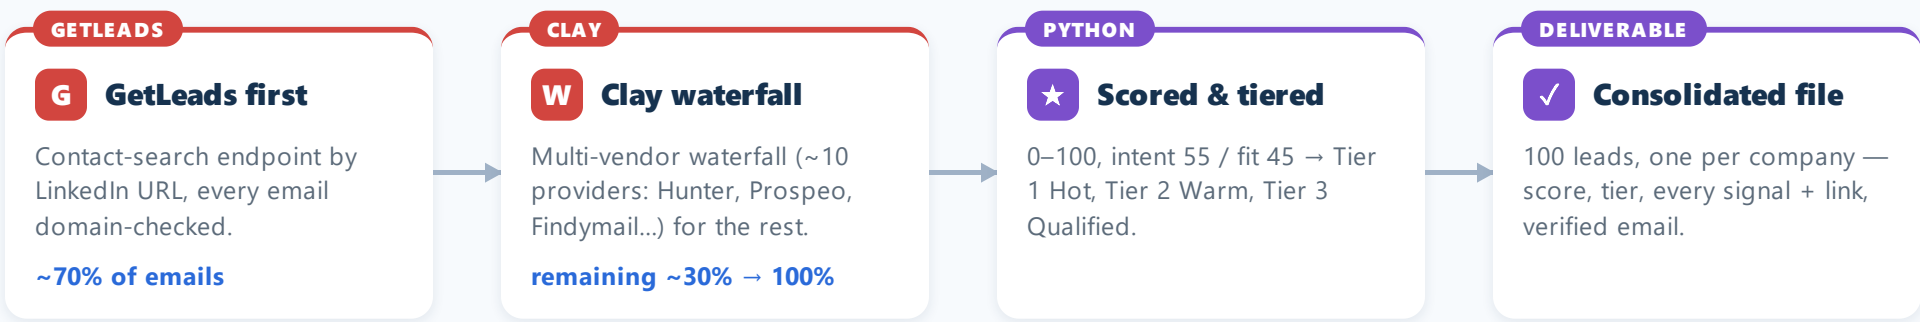

STAGE 2 · DECISION-MAKERS & QUALIFY

STAGE 3 · INTENT SIGNALS (5, SCORED & WEIGHTED)

STAGE 4 · EMAILS, SCORE & DELIVER

THE RESULT

100 verified

Email coverage 100%
Every lead is reachable — domain-checked

5 signals

Hot 14 · Warm 47 · Qualified 41
Every lead scored 0–100 and tiered

~1,400 reserve

Scraped, ready to enrich
Scales past 100 anytime

WHAT IT GAINED US

An intent-ranked, fully verified list — reps work the Hot tier first, and every email actually lands.
